Thick lines = BLA beta, vHPC theta, BLA-vHPC beta wPLI. Delta is this animal, not the FDR test.
wPLI is the FC measure (not MSC). 1.0 on power = that week's BL1.
C1/C2 group FDR (n=11-12 mice; not this animal): BLA beta bursts down, BLA beta/BL1 down, vHPC theta/BL1 up, BLA-vHPC beta wPLI n.s.
